

There are many technical and business reasons to use Reeltech lighting lifts, all of which are responsible for the cost-effective and efficient operation of your lighting solution.

10 good reasons to use REEL TECH lighting lifts

1 | Easy access

For cleaning, maintenance or servicing of lighting fixtures in a large mounting height or in inaccessible places; This will save you the use of a lift or a scaffold!

REEL TECH reduces the use of time and material to a minimum!

2 | Undisturbed manufacturing processes

You don't have to worry about stopping conveyor belts and thus a conductor or lift-related production stop is not necessary.

REEL TECH ensures trouble-free production processes!

3 | Floor protection

Beautiful rooms are often designed with floors made of wood, glass, carpet or marble. The use of a ladder, a scaffold or a platform lift is often associated with damage to the expensive floor, respectively.

REEL TECH prolongs the life of your expensive and fragile floors!

4 | Uninterrupted customer interaction

In areas with important customer traffic (hotels, railway stations, airports, etc.) the use of a ladder, scaffold or platform lifts is usually a time-consuming, unattractive enclosed space, which restricts customer interaction. The cost and effort to plan these outtages accordingly are considerable as well.

REEL TECH offers an excellent service solution to leave the customers undisturbed!

More than **15,000** lifts are in use across Europe to **save money, resources and time.**

Railways (ÖBB, DB, SNCF, NSB) - Shopping Malls (Zürich, München, Stockholm, Helsinki, Warschau, Krems) - Furniture Stores (Kika, Leiner) - Breweries (Carlsberg, Guinness, Forst) - Exhibition Companies (Hannover, Basel) - Dairies - Research Center Cern - Universities (Luxembourg, Lübeck, Köln, Düsseldorf, München, Essen, Frankfurt, Bochum) - Schools, Airports (Helsinki, London Heathrow) - Government buildings (Bern) - Hotels, churches, ...

10 good reasons to use REEL TECH lighting lifts

5 | Multiple uses

Also REEL TECH offers alternative uses such as the power zoom, for easy distribution of electricity; it's also ideal for banners. Advertising banners can be exchanged at frequent intervals and it becomes easier to lease them out more effectively.

REEL TECH supports a multitude of applications.

7 | Operating hours counter

The continual use of LED lights, the associated extension of operating hours and investment capital lead to an increase in the guarantee discussions between users and their lighting supplier. REEL TECH is able to reliably report the working hours of your lighting fixtures.

REEL TECH is your reliable, independent status supplier for your lighting solution!

9 | Cost-saving

REEL TECH lighting lifts will save costs of lifting platforms, technical personnel, scaffolding, transports and insurance. In addition, overtime and night surcharges for related operations are reduced as well. In addition, the energy-saving use is supported by the fast and easy operation of entire lighting groups!

REEL TECH assists in lowering your costs and making them calculable!

6 | Safety and Certification

Quality and product safety are guaranteed by TÜV-certification and the European CE mark! The devices provide patented features such as a safety stop, auto-stop, reliable contact electricity transmission and many others. This guarantees an absolutely maintenance-free operation! Also, the risk of accidents in the handling of ladders or scaffolds and power related injuries is negated; and it creates a convenient maintenance method via remote control on the ground-level.

REEL TECH, a certified solution to guarantee more safety!

8 | Warranty & maintenance free

The units are completely maintenance free (!) and are not subject to regular audit requirements! The product life is set at about 25 years! Flexible warranty models give you additional security!

REEL TECH, just there when you need it!

10 | Model diversity

A range offers more than 60 models with a carrying capacity of 5 kg to 500 kg, rotorbanner for advertising and a power distribution solution from the ceiling.

REEL TECH fulfills your wishes and capacity needs!

Move it, it's possible
